Executive Leadership

Questions? Email hello@crowdpointtech.com or visit us at <https://crowdunit.com>.

“Having a diverse group of professionals on our Advisory Board has been immensely beneficial for the company and its customers. This is because the different perspectives from different fields and expertise will allow the company to craft better solutions and products for its customers.

For example, our Sr. IBM Executive and our Blockchain Expert have provided unique insights on the technical aspects of the company's operations. Our Economic guru from Guggenheim has provided us an insider's insights into the best way to design the company's financial model.

Additionally, having our diverse group of advisors has helped the company to better understand the needs of its customers, cultural differences and geographic challenges as different leaders bring different experiences to the table.

Going forward our Advisory Board will help the Company ensure that it is able to craft products that are tailored to its customers' needs.

Furthermore, the presence of a diverse advisory board will also foster better communication between the company and its customer base, as different perspectives can be easily identified.

All in all, CrowdPoint is pleased and humbled for having the ability to assemble such a diverse group of professionals on our advisory board. They are a great asset for a decentralized cloud company powering Web 3, as it will help the company to better understand and cater to its customer base.”

-Sean Michael Brehm, Chairman & CEO, CrowdPoint
